SUMMARY

Computer Engineering graduate and full-stack developer building production-grade backends (Python, Node.js / NestJS) and cross-platform mobile apps (Flutter), with 12+ projects spanning backend, mobile, and full-stack. Two-time hackathon finalist. Experienced in location-based data systems, applied cryptography, and signal processing — focused on clean, scalable, data-driven solutions.

TECHNICAL SKILLS

Backend & DB: Python, Node.js, NestJS, Java/Jakarta EE, Express, MySQL, PostgreSQL, Redis

Mobile & Frontend: Flutter, Jetpack Compose, React, TypeScript, JS, HTML/CSS

Architecture & Tools: MCP, REST, WebSockets, SSE, Cryptography (Ed25519/JWS), Docker, Prisma, S3, Git

Data & AI: Signal Processing, FFT/STFT, Data Processing, Computer Vision

FEATURED PROJECTS

GeoIntel MCP — Location-Based Decision Support Platform

2025 – 2026

Python, MCP, REST APIs, PostgreSQL · GitHub

- Built a production-grade decision-support backend with a modular service-oriented design (orchestrator, MCP clients, DB helpers), integrating 2+ external APIs (HERE Maps, weather).
- Implemented cost-optimized routing and multi-source data aggregation with caching to cut repeated API calls.
- Exposed a clean REST layer consumed by the GeoIntel mobile client for real-time location insights.

Moka Agent Wallet — AI Agent Payment Authorization Platform

2026 · Hackathon Finalist

NestJS, Prisma, PostgreSQL, Redis, React, Docker · GitHub · Live Demo

- Built a NestJS + Prisma + PostgreSQL authorization pipeline that lets AI agents spend company funds safely — Ed25519/JWS request signing, mandate-scoped tokens, and a 60s nonce replay window.
- Combined a deterministic rule engine (category, limit, validity) with an LLM risk warden (LOW/MEDIUM/HIGH) that can block or escalate to a human but never approves on its own; falls back to a deterministic mock on API timeout.
- Designed a hash-linked, append-only audit ledger enforced by a PostgreSQL trigger with a /ledger/verify chain check, plus a React dashboard streaming decisions live over SSE.

JulardzijaSmile — Clinical Management Platform (Full-Stack)

2025 · Hackathon Finalist

NestJS, Flutter, Prisma, PostgreSQL, S3, Docker · GitHub

- Built an end-to-end hair-transplant clinical platform; Flutter "Photo Wizard" standardizes patient imaging across 5 fixed angles.
- Engineered a NestJS + Prisma + PostgreSQL backend with S3 image storage and real-time WebSocket doctor–patient chat.
- Containerized the full stack with Docker Compose and built a React admin panel for appointment and timeline management.

KitapKöşem — Social Book Platform

2025

Java, Jakarta EE (Servlet/JSP), MySQL, AJAX · GitHub

- Developed a layered MVC web app (Java/Jakarta EE) with BCrypt authentication, a DAO data layer, and imgBB image uploads.
- Built an AJAX infinite-scroll timeline and a 5-star rating system over a normalized MySQL schema.

Noise Cleaner — Real-Time Audio Processing

2025

Python, FFT/STFT, PyQt5 · GitHub

- Built a real-time denoiser using STFT spectral subtraction with Hann windowing and Overlap-Add synthesis (50–75% frame overlap).
- Created a PyQt5 GUI with live waveform visualization and adjustable filtering parameters.

Additional: Kopernik (Flutter/Firebase), Rize Kültür (Node.js/Flutter), GeoIntel Mobile (Flutter), Jetpack Compose E-Commerce (Kotlin/MVVM), Turing PIN Simulator (Python/automata).

EXPERIENCE

Software Development Intern / Mobile Developer

Jul – Aug 2025

Rize Municipality (Rize Belediyesi)

- Developed and optimized Flutter mobile apps for municipal digital services over a 6-week internship, delivering UI optimizations and backend integration workflows.

EDUCATION

B.Sc. in Computer Engineering — Ondokuz Mayıs University — Graduated 2026

Visual Communication (Open Education) — Anadolu University — In Progress – 2027

CERTIFICATIONS

- Savunma Sanayi Akademi SSA 401 — Defense Industry Training (2026)
- CryptoGuard: Blockchain Security in Development — HP / edX (2026)
- Generative AI Mastery — HP / edX (2026)
- Jetpack Compose for Android — Kasım Adalan Bootcamp (2025)
- Blockchain 101 — Coderspace Bootcamp (2025)
- OHS Services Management Certificate (2025)

LANGUAGES

- Turkish — Native
- English — Intermediate
